** Translated simultaneously in English and Korean*

It is a great pleasure to invite you to attend the International Conference on “Korea’s Green Growth together with the EU: Building a Global Partnership” to be held in Seoul, Korea, on December 16th, 2011.

The subject of the conference brings forth the pressing matter of green growth and emissions trading. We hope that this conference will provide a stage for academics, researchers, analysts, government officials and policy makers to actively exchange their ideas and visions regarding policy and research.

The environment is a worldwide heritage and value that should be conserved not only by individual states, but by the cooperation of all humanity. Despite the urgent and severe environmental problems, relevant international agreements and consensus are taking considerable amounts of time and effort. The damages faced by humanity will increase with every delay.

This conference recognises that previous international conferences on the environment had problems such as the lack of understanding between the parties involved, the absence of a clear objective, and the failure to develop expert advice into constructive discussions and policy reflection. This conference aims to share the experiences of the first movers, the EU and its businesses, with Korea, as a second mover. So that Korea may quickly establish an effective system suited to its situation and green growth requirements. The role of Korea as a second mover will not cease at merely establishing its own system but include contributions to green growth worldwide. Therefore, the second purpose of this conference is to lead a discussion on methods for Korea and the EU to cooperate in supporting green growth for developing nations.

We sincerely look forward to welcoming you at the conference.

Sincerely,

Dr. Norbert Eschborn
Director, Konrad-Adenauer-Stiftung Korea Office

Prof. Young-Ryeol Park
Director, Yonsei-SERI EU Centre

Time	Programme
09:00~09:20	<p>Registration</p>
